

Digital Health

Supporting your goals across the continuum of care. Our team helps clients to advance business opportunities in all stages of development.

Our team of attorneys and professionals assists participants in the digital health sphere in all stages of product and company development, from formation to financing to exit strategy. We advise clients on online services for clinical consultations and prescriptions, including issues related to the status of the patient, physical examination, electronic prescribing, informed consent requirements and the establishment of provider-patient relationships. We also help health care providers and other industry stakeholders evaluate new payment and reimbursement models contract for services, protect their data and intellectual property, evaluate technology platforms and obtain financing.

Our eHealth and telemedicine clients include:
