

# Artificial Intelligence

Our team of patent practitioners, including Ph.D. scientists and engineers, helps clients grow and protect their technologies and products in many areas such as:

- Platforms
- Model Architecture
- Edge Processing
- Model Training
- Natural Language Understanding
- Speech Recognition
- Design Workflow
- Biotech
- Generative Models
- Security
- FinTech
- Food Industry

We do more than simply provide patent support:

- AI primer on frameworks and best practices for patent protections related to AI
- Strategies to design and build valuable patent portfolio
- Focus on differentiating aspects of AI, for example:
  - Prompt generation/refinement
  - Human interactive workflow

## Technology Protection Strategist

Our team has a strong technical background, as our attorneys and professionals have decades of experience working on patents for products incorporating machine learning and artificial intelligence solutions. Partnering with clients, we work as a team to strategically use and protect AI. We are recognized as a leading firm in AI patenting and a go-to team to protect AI inventions.
