- » Autonomous Vehicles (AVs)
- » Internet of Things (IoT)
- » Logistics

Integrated Perspectives Deliver Full-Service Solutions

Health & Life Sciences

Digital Health and Telemedicine

- Virtual care and platforms

MedTech

- Medical devices, diagnostics, and genomics

Financial Services

FinTech and Digital Assets

- Banking, blockchain, and commodities

InsurTech

- Claims, underwriting, and risk automation

Specialized Industry Verticals

AgTech

- Precision farming and agribusiness

EdTech

- Digital learning and institutional systems

Representative Experience & Success

High-Stakes Litigation

- Serve as lead counsel to a **global communications technology company** in federal court litigation alleging an international conspiracy to misappropriate trade secrets and interfere with contracts across three continents, addressing complex software and hardware issues with major telecommunications customers, and protecting the company's position in the multi-billion-dollar base station antenna market that is critical to global mobile data transmission.
- Serve as lead trial counsel for a **global data storage company** in multiple billion-dollar patent infringement cases and other intellectual property cases nationwide and winning complete defense jury verdicts, summary judgment, inter partes review decisions, and appeals at the Federal Circuit.
- Filed and won dispositive motions for **app-based companies** on whether an app is deemed a "product" under U.S. product liability law, cementing our status as one of the few firms in the U.S. with hands-on experience in platform liability — product liability litigation against software platforms.

Mergers & Acquisitions

- Represented a **retail supply-chain solutions provider** in its acquisition of a provider of software tools to Amazon sellers for \$210 million, structuring the deal with a significant stock component, and facilitating the integration of specialized products to strengthen the buyer's revenue recovery business and expand support for buyer's customers.
- Advised a specialized **health care identity resolution company** on its sale to a clinical research and health care data analytics company, navigating a notably complex debt and equity structure involving over 50 stock and option holders and multiple secured, unsecured, and subordinated lenders.

Capital Investment and Deployment

- Advised a **cloud-based B2B technology company** from formation through IPO and beyond, managing all U.S. legal needs — including corporate, securities, M&A, IP, and employment matters — and supporting the company's international expansion and ongoing growth.
- Represented a **New York City-based private equity firm specializing in growth equity investments in the financial and business technology sector** in numerous initial investments, add-ons, and exit transactions.

Artificial Intelligence

- Serve as co-counsel to a **major technology company** in landmark consolidated copyright litigation involving the use of news content to train generative AI models, addressing novel fair use and copyright issues, managing complex multi-district proceedings, and leading strategy on dispositive motions, discovery, and coordination of federal cases nationwide.
- Represented a **leading enterprise AI security and trust software firm** in the close of a \$15 million Series A Preferred Stock financing round and advised on its initial Series Seed Preferred Stock financing and SAFE financings to support growth and innovation.

Technology Transactions

- Manage entire portfolio of technology transactions for a **Fortune 100 logistics company**, including by counseling and negotiating agreements for significant IT software services and implementation contracts, artificial intelligence / machine learning software development and licensing, robotics and automation solutions, transportation and fleet management solutions, drone and airline technologies, and advising on the launch of customer and franchisee solutions.
- Develop and revise customer and channel partner templates, negotiate customer and vendor agreements, and advise on AI and privacy considerations for an **AI-driven financial accounting technology provider** to support the rollout and compliance of its SaaS solutions for accounting firms and corporate clients.
